

# **Round Buzzer**

# Ø13.0×2.5 mm

### With wire

# CC13P025W15-4800

### Revision

| Date       | Version | Status | Changes       | Approver |
|------------|---------|--------|---------------|----------|
| 2018/12/26 | V0.1    | Draft  | First release | AX       |
|            |         |        |               |          |

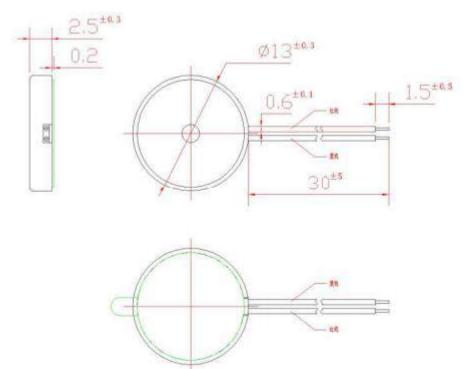

| Parameter             | Condition                | Specification | Units |
|-----------------------|--------------------------|---------------|-------|
| Oscillation Frequency |                          | 4.8           | KHz   |
| Operating Voltage     |                          | 3~25          | Vp-p  |
| Rated Voltage         |                          | 9             | Vp-p  |
| Current Consumption   | at Rated Voltage         | MAX.6         | mA    |
| Sound Pressure Level  | at 10cm at Rated Voltage | MIN.80        | dB    |
| Capacitance           | at120Hz                  | 15000±30%     | PF    |
| Tone Nature           |                          | Constant      |       |
| Operating Temperature |                          | -20~ +70      | C°    |
| Storage Temperature   |                          | -30 ~ +80     | C°    |
| Weight (MAX)          |                          | 0.75          | gram  |
| Housing Material      |                          | PPO( Black )  |       |
| Environmental         |                          | RoHS          |       |
| Protection Regulation |                          |               |       |

Notes: All specifications measured at 5~35°C, humidity at 45~85%, under 86~106 kPa pressure, unless otherwise noted.

### **RELIABLITY TEST**

| 1     | High Temperature Test               | After being placed in a chamber with 70 2°C for 96 hours and then  |  |  |
|-------|-------------------------------------|--|--|--|
|       |                                     | being placed in normal condition for 2 hours.  |  |  |
| 2     | Low Temperature Test                | 96 hours at -40°C±3°CAfter being Placed in a chamber with -30 2 ℃ for 96                                       |  |  |
|       |                                     | hours and then   |  |  |
| 3     | Humidity Test                       | After being Placed in a chamber with 90-95% R.H. at 40 2°C for 96  |  |  |
|       |                                     | hours and then being placed in normal condition for 2 hours.   |  |  |
|       |                                     | The part shall be subjected to 5 cycles. One cycle shall be consist of :                                       |  |  |
|       | Temp./Humidity Cycle                | +70°C  |  |  |
| 4     |                                     | +25°C +25°C  |  |  |
|       |                                     | -<br>0.5hr 0.5 0.25 0.5 0.5 0.5 0.25<br>3hours   |  |  |
|       |                                     | Allowable variation of SPL after test: 10dB.   |  |  |
|       |                                     | After being applied vibration of amplitude of 1.5mm with 10 to 55 Hz   |  |  |
| 5     | Vibration Test                      | band of vibration frequency to each of 3 perpendicular directions for  |  |  |
|       |                                     | 2 hours .  |  |  |
| 6     | Drop Test                           | Drop the speaker contained in normal box onto the surface of 40mm thick board 10 times from the height of 75cm |  |  |
|       |                                     | The force of 9.8N(1.0kg) is applied to each terminal in axial direction for                                    |  |  |
| 7     | Termination Strength                | 10 seconds.  |  |  |
|       |                                     | No visible damage and cutting off.   |  |  |
|       |                                     | Lead terminals are immersed in rosin for 5 seconds and then  |  |  |
| 0     | Solderability                       | immersed in solder bath of +300 5°C for 3 1 seconds .  |  |  |
| 8     | Test                                | 90% min. lead terminals shall be wet with solder   |  |  |
|       |                                     | (Except the edge of terminals).  |  |  |
| Stand | l<br>dard Test Condition: a) Temper | ature : $+5 \sim +35^{\circ}$ C b) Humidity : 45-85% c) Pressure : 860-1060mbar                                |  |  |
| nand  | and rest condition. a) remper       |  |  |  |

一般测试条件: a) 温度 : +5 ~ +35℃ b) 湿度 : 45-85% c) 气压 : 860-1060mbar

a) 温度 : +25 ± 2℃

Judgment Test Condition: a) Temperature : +25  $\pm$  2°C b) Humidity : 60-70% c) Pressure : 860-1060mbar

争议时测试条件 :

b) 湿度 : 60-70%

c) 气压: 860-1060mbar

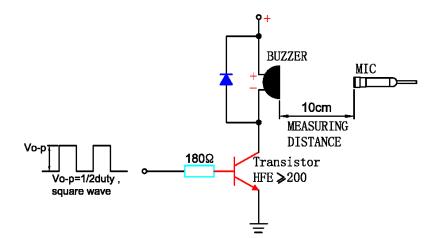

#### **MEASURING METHOD**

#### **Standard Measurement conditions**

Temperature:25±2°C Humidity:45-65%

#### **Acoustic Characteristics:**

The oscillation frequency, current consumption and sound pressure are measured by the measuring instruments shown below

In the measuring test, buzzer is placed as follows:

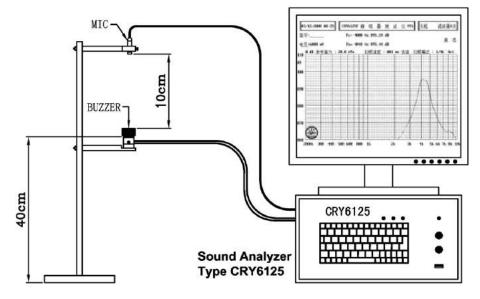

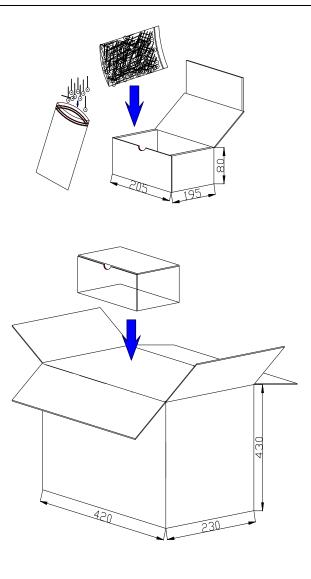

Fig. 1 Block Diagram for Measurement Method

|   | 包装名称 | 包装数量(pcs) | 包装尺寸(mm)         |
|---|------|-----------|------------------|
| 1 | 一批袋  | 200       | $150 \times 100$ |
| 2 | 一小盒  | 1000      | 205×195×80       |
| 3 | 箱子   | 10000     | 420×230×430      |
